## EDUCATION

---

### Computer Engineer & Informatics (Intergraded Masters)

University of Patras

2018-2024

### ETSI de Sistemas Informáticos

Universidad Politecnica de Madrid

2022-2023

## PERSONAL SKILLS

---

- Programming Skills: Java, C#, Python, Javascript, React, Springboot, SQL, NoSQL
- Knowledge and appliances on Agile Methods for project management and quality assurance
- Git usage
- C2 certificate in English language
- Office 365

## PROFESSIONAL EXPERIENCE

---

### Knowledge A.E.

March 2024 - May 2024

#### Full Stack Developer Intern

Implemented various APIs using Java and developed a functional Booking Engine for an early company project using React and Springboot API.

Successfully cooperating with a team of developers using the SCRUM method to manage and organise our work

## PERSONAL WORK

---

- **Evaluation of Pedestrian Behavior in Virtual Reality for Traffic Education Using Eye Tracking**

*This is my final Thesis on my intergraded-Masters degree on Computer engineering.*

Link: <https://github.com/Xpecialist/Evaluation-of-Pedestrian-Behavior-in-Virtual-Reality-for-Traffic-Education-Using-Eye-Tracking>

- **Area 15 : Run for your life!(Video Game)**

*In the process of learning how to engineer a software project we created a demo of a 2D platformer video game with Python.*

Link: <https://github.com/Xpecialist/SoftwareEngineeringProject>

- **Activity on Cloud**

*As part of a team i made a demo version of a a Booking Engine for activities. We used React and Tailwind for the frontend and Spring API for the backend. We implemented the UI and its functionality as well as a Admin interface with various functionalities and information about the activities he is providing.*

- **App for Controlling Covid-19 cases at certain locations**

*We made a website for users where they can see a map with shops that they dont have covid-19 cases and they are safe to visit. The website tracks the users current location and smartly displays the shops as markers with green the ones with no covid cases and with red the ones with covid-cases.*

Link: <https://github.com/Xpecialist/WebProject>

- **NoSQL Movie Database**

*Created a NoSQL database with CassandraDB and some popular queries for it*
